

Fire & Phoenix - Chicago 1871

Digital Heritage Project Presentation

Authors: Abdulaziz Abdumajidov and Gülcihan Saçlı
Institution: Politecnico di Torino
Discipline: Digital Heritage
Date: 2025

Project Description

Title: Fire & Phoenix - Great Chicago Fire 1871

Type: Multimedia interactive website

Goal: Demonstrate collective memory formation through media

Created Components

- One-page multimedia website (3556 lines of code, 10 sections)
- Interactive elements (press ↔ map slider, game, 30-question quiz)
- Multilingualism (Russian, English, Italian, Turkish)
- Canvas animations (flames, sparks, ash)
- Historical accuracy (Harper's Weekly materials 1871, 1872 maps)

Project Statistics

Metric	Value
Lines of code	5556
Languages	4
Sections	10
Quiz questions	30
Canvas animations	3
Video materials	7+

Technologies

- HTML5 (3556 lines) - structure
- CSS3 (~800 lines) - styling and animations
- JavaScript (~1200 lines) - interactivity
- Canvas API - fire animations
- SVG Graphics - graphic elements
- Video Elements - video materials

Main Sections

- Hero - introduction with KPI metrics
- "Where did it begin?" - interactive video
- Timeline Animation - fire chronology
- Press vs Map - interactive slider
- Ruins → Hope - evolution
- Detailed Timeline - 6 key moments
- Video gallery - 6 historical illustrations
- Cow myth - storytelling
- Interactive game - Canvas gameplay
- Quiz - 30 questions

Results

The project demonstrates how digital tools can transform historical material into a modern interactive educational space. A fully functional website has been implemented with multilingualism, interactive elements, and historically accurate content.
